## WSM Blower Installation Instructions

Remove one of the wing nuts and the small flat washer from the mounting post. Leave the large washer and other wing nut on the mounting post about halfway (figure 1). Open the vent you want to install the blower. From the outside of the WSM put the head of the mounting post through the bottom hole, making sure the head straddles the hole. (figure 2).

Holding the tip of the mounting post tighten the wing nut (figure 3). Installed mounting post (figure 4)

Put the blower on the mounting post with the cable on top as shown put the small flat washer then the wing nut and finger tighten (figure 5). Installed blower (figure 6)

For more information, please see the instructional videos posted on our website at [www.rocksbarbque.com](http://www.rocksbarbque.com)

Remove the Blower in the reverse order. Careful if you have been cooking the hardware will be hot!
